MANAGEMENT INTERPRETATION

The report combines information for decision-making. Management assesses its meaning, decides on actions and monitors their effects.

The report does not make personnel decisions or display an individual employee's data.

People, financial and SLI data are shown side by side

The relationship supports interpretation, but the report does not claim causality.

HOW SLI IS FORMED

The average of the approved Companion measurement and the measurement taken during the Balance survey forms the user's SLI value.

The company report shows only the anonymised company-wide average calculated from participants' SLI values. It cannot be traced to an individual.
